<b>Current Delinquency Rate (Total Portfolio)*</b>	0.11%
--	-------

**NOTES:**

Estimated Current LTV\* :

The estimated current LTV is calculated using the current mortgage balances submitted by the lender divided by the estimated current property value (property value at origination adjusted by change in house price index at an FSA level).

Current Delinquency Rate\*:

This is calculated as the number of mortgage loans that have a delinquency status of 90 days or greater divided by the total number of mortgage loans currently in force.

**Potential impact of economic downturn on insured loans:** Canada Guaranty conducts regular stress testing. While a severe economic downturn (i.e. elevated unemployment and declining house prices) would adversely affect incurred losses and capital levels, the company's capital position allows a sufficient buffer to withstand a 1/200 year economic downturn and remain solvent.
