Canada Guaranty recognizes that a self-employed borrower's income from their Notice of Assessment does not always represent the actual income available for mortgage repayment. Canada Guaranty supports assessing the reasonability of the application income by considering the nature and tenure of the business, and factors such as the overall credit profile, financial position and current shelter payment of the borrower(s).

The following income requirements must be met for each self-employed borrower:

1. REASONABILITY:

The borrower's income must be reasonable for the nature and tenure of the business, and must align with the credit profile and current financial position of the borrower.

2. SUBMISSION NOTES:

In order to appropriately assess the reasonability of the borrower's income, the submission notes must include the following information for each self-employed borrower:

- The amount of the income confirmed by line 15000 on the NOA from the most recent tax year at the time of application.
- The stated gross revenue of the borrower's business.
- The type of business being owned and operated (e.g., landscaping, bookkeeping, etc.).
- The ownership structure (e.g., sole proprietor) and the percentage of ownership.

NOTE:

1. Any additional borrower whose income is verified in the standard way does not need to submit the above information to Canada Guaranty.
2. For higher incomes, additional information and/or documentation may be requested.

(2) Greenhouse Gas (GHG) Emissions:

A new construction or existing home that falls within the top 15% of the housing inventory with the lowest NRCan EnerGuide tonnes/year GHG emissions rating for the Heating Degree Day (HDD) zone is eligible for the 25% premium refund.

To determine this, the Heating Degree Day (HDD) zone in which the building is located, is required. The HDD zone can be determined using [NRCan's HOT2000 Climate Map](#) as follows:

1. Enter the property's full civic address to obtain the "Annual Heating Degree Days" value (in number of degree days).
2. Based on the HDD number (the HDD RANGE), determine the corresponding HDD zone number (Zones 4 – 8) using the table below.
3. To be within the top 15th percentile threshold, the Greenhouse Gas (GHG) emissions rating (tonnes/year) on the EnerGuide Label must be equal to or less than the corresponding threshold, as outlined in the table below.

GHG (tonnes/year) Top 15th Percentile Thresholds

HDD ZONE	ZONE 4	ZONE 5	ZONE 6	ZONE 7A	ZONE 7B	ZONE 8
HDD RANGE	< 3000	3000 – 3999	4000 – 4999	5000 – 5999	6000 – 6999	>= 7000

NS		<= 13.7	<= 13.7

SK			<= 11.2	<= 11.2	<= 11.5	
YT					<= 2.1	<= 1.7

Please Note:

- Quebec's low GHG thresholds are rounded up to 0.1 tonnes / year.
- No EnerGuide Label issued yet for NS zone 5, NT zone 7B, SK zone 6. For those zones, the threshold is assumed to be same as that of next highest HDD zone.
- Where no HDD zone exists for that province, no thresholds are provided.
- For EnerGuide labels issued before Nov 2020 that apply to AB zone 8, BC zone 8 and NB zone 5, please use thresholds 14.4, 2.8 and 5.8 respectively.
